UNIVERSITY OF NEVADA, LAS VEGAS
Department of Mathematical Sciences

# MATH 182 – Calculus II

Discussion Syllabus and Makeup Assessment Guidelines

Fall 2026 | Sections 1011 and 1012

## 1. Course contacts and meeting times

| | |
|---|---|
| Main course instructor | Steven Isaak |
| Teaching assistant | Md. Ikramul Haq Khan, MS (Discussion Instructor) |
| TA email | khanm18@unlv.nevada.edu |
| TA office | CDC 7, Room 718 |
| Section 1011 | Friday, 2:30–3:45 PM; CEB 207 |
| Section 1012 | Friday, 4:00–5:15 PM; BHS 201 |
| TA office hours | **Monday, 10:00 AM–12:00 PM** |
| | **Friday, 10:00–11:00 AM** |
| | Three hours per week; additional meetings by appointment. |

All meeting times are local Las Vegas time. These office hours replace the previously listed TA office hours.

**Scope and authority.** This document supplements the main instructor's syllabus and applies to the discussion sections. Steven Isaak determines course requirements, assessment dates, grading rules, permitted assessment resources, and makeup approval. Applicable UNLV/NSHE policies govern if a provision conflicts with them. This supplement establishes no separate grading weights, attendance penalties, textbook requirements, or examination dates.

## 2. Purpose of discussion and learning goals

Discussion helps students connect calculus concepts, graphical interpretation, and mathematical reasoning through guided examples and independent practice. Specific topics and their sequence follow lecture and the main course syllabus. By participating actively, students should become better able to:

- interpret a problem, identify relevant quantities, and select an appropriate calculus method;
- connect graphs and geometric representations with symbolic calculations;
- explain each step, justify assumptions and limits, and use mathematical notation precisely;
- check signs, units, domains, and the reasonableness of a result;
- recognize errors and revise a solution using feedback.

## 3. Office hours and communication

Office hours are open for course questions, review of attempted problems, and study guidance. No appointment is required for regular office hours. Emailing the topic or problem beforehand is encouraged but is not a condition of receiving help. Bring the question, your work so far, and the point at which you became uncertain. For email, use a subject such as *MATH 182 – Section 1011 – Question about integration.* Include your name, section, assignment or assessment, and a specific question. Check WebCampus and course email for announcements. Appointments and makeup arrangements require explicit confirmation; sending a request does not itself reserve a time.

## 4. Preparation, participation, and mathematical work

**Before discussion:** review the relevant lecture material, attempt assigned problems, and identify one or two questions. Bring notes, writing materials, and any resources permitted by the main instructor.

**During discussion:** participate respectfully, attempt problems before viewing a solution, and explain your reasoning. Questions and mistakes are part of learning. Avoid unrelated device use and side conversations that disrupt others. Work collaboratively when permitted, while ensuring that each student can explain the resulting solution.

**After discussion:** retry challenging problems without copying the example, compare methods, and record errors to revisit before the next assessment. A clear solution should define quantities, show setup and intermediate steps, label graphs and axes, and state the final result with appropriate units or conditions.

Regular attendance and preparation are encouraged. Any graded participation or attendance requirement, assignment deadline, late-work rule, or absence consequence is governed by the main instructor's syllabus. If you miss discussion, obtain the relevant material and contact the TA about unresolved questions.

## 5. Academic integrity, technology, and AI

All submitted work must comply with the main instructor's directions and UNLV academic integrity requirements. Collaboration is permitted only to the extent authorized for the particular activity. Do not submit another person's solution as your own or share restricted assessment content.

**Practice and homework.** Subject to the main instructor's rules, calculators, software, and AI tools may support learning: for example, checking a calculation or exploring a graph. Verify their output and understand the reasoning. If AI-generated content is incorporated into submitted work, acknowledge the tool and its use. Permission to use a tool for practice does not imply permission to use it on graded work. Answers without the required mathematical reasoning may not receive credit under the course grading rules.

**Quizzes and examinations.** Use only resources explicitly authorized for that assessment. Unless expressly permitted, do not use phones, smartwatches, earbuds, online tools, AI, messaging, notes, or outside assistance. Follow the assessment's calculator rules. Suspected misconduct is referred to the main instructor and handled under University procedures; this supplement creates no independent sanction.

## 6. Inclusive learning, accessibility, and support

Students are expected to help maintain a respectful learning environment. Discrimination, harassment, and demeaning treatment interfere with learning. Ask questions, listen to classmates, and discuss mathematical ideas respectfully.

For approved accommodations, coordinate early with the main instructor, TA, and UNLV Disability Resource Center (DRC). Accommodation arrangements, including assessment timing and setting, follow the approved plan. Avoid sending unnecessary sensitive medical information by ordinary email.

Seek support early through TA office hours, the Math Learning Center, the CDC 7 Calculus Lab, or University academic support services. Consult current service schedules before visiting. Useful official resources include:

- Disability Resource Center: `https://www.unlv.edu/drc`
- Academic Success Center: `https://www.unlv.edu/asc`
- University student policies: `https://www.unlv.edu/policies/students`

## 7. Makeup examinations and quizzes: requesting an arrangement

These procedures integrate the supplied makeup guidelines. They apply to examinations and, when authorized by the main instructor, missed discussion quizzes. A makeup is intended to provide a fair assessment opportunity when an eligible circumstance prevents attendance; it is not automatically available as a scheduling preference.

**Step 1 – Communicate promptly.** Contact the TA and main instructor as early as possible. For a foreseeable absence, aim to give at least one week's notice when reasonably possible. For illness, emergencies, or another unexpected circumstance, contact them as soon as reasonably possible. University-specific notification rules take precedence over this general request.

**Step 2 – Identify the assessment and circumstance.** Include your name, section, assessment name and original date, a brief explanation, and feasible alternative times. Provide official notification or documentation when required by applicable policy or requested through the appropriate course procedure. A detailed medical history is not needed in an initial email.

**Step 3 – Obtain approval.** Steven Isaak determines authorization under the course syllabus and applicable University policy. The TA coordinates administration of an approved makeup. Do not assume that an email request or an unconfirmed office-hour visit constitutes approval.

**Step 4 – Confirm the complete arrangement.** Obtain confirmation of the date, start time, full assessment duration, location, permitted materials, supervision arrangements, accommodations where applicable, and submission procedure. CDC 7 is the usual coordination location; use the exact testing room specified in the confirmation.

**Step 5 – Attend and submit as directed.** Arrive ready to begin at the confirmed time and follow all instructions. If another emergency arises, communicate promptly to seek a revised arrangement.

### University-sponsored activities and protected absences

For official UNLV extracurricular representation, submit the required official written notification to the instructor at least one week before the missed class. Eligible students receive makeup opportunities under the University's policy and its conditions.

For religious observances outside state holidays or class recess, UNLV asks students to notify the instructor within the first two weeks of the semester. The policy provides an opportunity during that semester to make up work missed for the observance. Follow the University's applicable procedures for religious and other protected absences; contact the instructor promptly if a notification issue arises.

Nothing in these guidelines narrows a student's rights under University or NSHE policy. Approved accommodation requirements remain applicable to makeup assessments.

### Other legitimate circumstances

Illness, emergencies, significant family circumstances, or other serious situations are considered individually by the main instructor. Decisions should preserve consistent academic standards while responding reasonably to the circumstances. Convenience alone does not establish entitlement to a makeup. Students should ask for consideration rather than assume that a request will be granted or denied.

## 8. Makeup scheduling, fairness, and examination conduct

### Normal scheduling windows

Approved makeups are normally coordinated during **Monday, 10:00 AM–12:00 PM**, or **Friday, 10:00–11:00 AM**, subject to a confirmed arrangement. These are scheduling windows, not automatic testing appointments. A full-length examination or an accommodated duration may require another approved time or setting. Ordinary office-hour support remains available to students.

For requests not governed by a specific University policy, the normal goal is to complete a makeup **within one week of the original assessment**, whenever reasonably possible. This is a normal procedure, not an absolute limit on protected absences or legitimate exceptional circumstances. Communicate early so the assessment can be completed before questions or solutions are released when feasible.

### Comparable assessment and secure administration

If original questions, solutions, or substantial assessment information have been released or discussed, the main instructor may authorize a different, comparable assessment. It should evaluate the same material and expected level of understanding; the main instructor determines its format, duration, and grading.

Assessment handoff alone does not establish permission to work independently without supervision. Follow the confirmed administration arrangements throughout the assessment. Any change in location, supervision, or return procedure requires confirmation.

### Student examination checklist

1. Confirm the assessment, start/end time, location, allowed resources, and return procedure before attending. Bring identification if requested.
2. Work independently and use only authorized materials. Put away unauthorized devices and resources as directed; do not access messages, online tools, AI, or assistance from another person.
3. Do not photograph, copy for distribution, share, or discuss restricted examination questions with others. Do not seek or use prior access to the assessment.
4. Follow instructions for breaks, leaving the room, questions, and any unexpected interruption. Report concerns promptly to the designated administrator.
5. Stop when instructed and submit all required examination materials using the confirmed procedure. Do not retain or alter answers after submission.

If you are late, cannot attend, or cannot comply with the confirmed conditions, notify the TA and main instructor promptly. Any revised time or consequence follows the main course syllabus and applicable policy; this supplement imposes no automatic penalty.

## 9. Resolution, policy references, and updates

Students and instructors should make a good-faith effort to reach a fair resolution of missed-work concerns. Start with the TA and main instructor; unresolved University-policy concerns may be taken through the appropriate department and University review channels.

This document supplements the main syllabus and applicable University policies. Policy summaries are provided for convenience; consult the official text at `https://www.unlv.edu/policies/students`. Makeup procedures draw on the supplied *MATH 182 Makeup Examination Guidelines*, Fall 2026, with office hours revised and administration details clarified. University policy reference checked October 14, 2026.

Material changes to discussion arrangements will be announced through course communication channels with prior notice when feasible. Keep this version with the main course syllabus.
